

Electrical & Instrumentation

Introduction

GR Production Services (GRPS) is a leading provider of operations and maintenance services to oil and gas facilities across Australia. We provide cost effective solutions bringing our extensive operations experience to every task.

Our Electrical and Instrumentation services are delivered in conjunction with our full suite of maintenance services, providing asset reliability to a range of conventional and CSG wellsites and facilities.

Key Capabilities

GRPS provides a full suite of Electrical and Instrumentation services:

- HV Electrical
- Solar Power
- Remote Area Battery Storage and Uninterruptable Power Supplies
- HV Complex Corrective
- LV Electrical
- ELV Electrical
- Instrumentation & Controls
- Hazardous Area

With over 150 Electrical and Instrumentation personnel, our team are highly competent oil and gas specialists, providing quality solutions aligned with tailored processes and procedures in our ISO Certified Integrated Management System. Expertise from our national operations provides 'on tap' solutions to assist with ongoing, ad hoc, or troubleshooting requirements. We hold current QLD and WA electrical contractors' licenses.
